

## Elan Custom Control

### COMMERCIAL PIZZA OVEN SPEED CONTROL

#### CONTROL INFORMATION

Elan designed and supplies a speed control for a large commercial conveyor oven OEM. This speed control is used in pizza ovens for a number of large pizza chains.

Elan took a Value Engineering approach and reviewed the entire system. Elan recognized electronic noise issues could be addressed through design. As well, by incorporating a dual power supply Elan eliminated the need for a very expensive separate transformer used by the OEM.

Elan designed the entire control, including all electronics, mechanicals (including tooled injection molded plastic display housing), etc. The control has worked well for the OEM and they have realized over \$100K in annual savings due to the elimination of the transformer alone.

#### **NOTE:**

This product was developed by Elan for a specific OEM customer. It is not available for sale.

The information above is intended to show Elan's control design and manufacturing capabilities. It is not a complete specification of the control or features included.
